SPECIAL

STEAK ON HOT STONE

It's not just a meal...
it is an experience.

The stone is made of some of the nature's finest materials. We heat the stone in our oven to about 600 degrees Fahrenheit and this will allow you to cook your food exactly as you like and the last bite will be as hot and delicious as the first. The high temperature of the hot stone method sears the steak faster and cooks in the natural juices and nutrients, enhancing the full flavor and tenderness of food.

This unique dry cooking method uses no oil or added fat. It ensures a clean and completely natural flavor that is not achievable with other cooking methods.
